-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Objections

Claims objected to because of the following informalities: There is no mention of the status of claims 2-57. Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 58-77 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. US Pat. 6,784,209. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-20 claim of said US Patent claims a method for supplementing the diet of an athlete with arginine, a source of amino acids and at least one substance which increases nitric oxide production selected from glycosidal saponins, ginseng, N-acetyl-cystein, glucomannan and folic acid where the source of amino acids is protein and the composition further comprises carbohydrates and the ratio of protein to carbohydrates is about 7 to 1 which anticipate claims 58-77.

Art Unit: 1616

Claims 58-77 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 58-77 of copending Application No. 10/799038. Although the conflicting claims are not identical, they are not patentably distinct from each other because the method claims of said copending Application disclose a dietary supplement containing a source of amino acids which is a protein and at least one substance which increases nitric oxide production, which are selected from glycosidal saponins, ginseng, arginine, acetylcysteine, glucomannan and folic acid, where the weight ratio of carbohydrate to protein is about 7 to 1.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Although Applicant indicates that this is a divisional application the double patenting rejection herein is applicable as there is no indication of a restriction requirement in the parent case. Further, Applicant's claims as indicated above include an embodiment which is the same or similar to that claimed in the parent case. See MPEP Section 804.01.

Conclusion

A facsimile center has been established in Technology Center 1600. The hours of operation are Monday through Friday, 8:45 AM to 4:45 PM. The telecopier number for accessing the facsimile machine is 571-273-8300.
